Professional Summary

Computer Science and Mathematics graduate with a genuine interest in building software that works. I enjoy the process of turning a problem into clean, functional code, and I have hands-on experience developing and deploying web applications. Outside of coding, I spent a year helping students understand mathematics, which sharpened how I explain technical ideas clearly. I am looking for a role where I can keep learning and contribute from day one.

Education

B.Sc Computer Science and Mathematics

University of Venda, Limpopo

20 May 2026

Relevant coursework: Python, Java, SQL

Technical Skills

Languages: JavaScript, Python, Java, SQL, HTML, CSS, REST API
